

PROFILE

I am a 23-year-old diligent and determined student. I am studying for a Master of Science in Technology at the University of Vaasa, which is why I also live in Vaasa. My major is automation and information technology. I enjoy playing football and working with information technology. I work extensively on various IT projects both for my school and in my free time, so I consider my skills in the field to be excellent.

JERE VÄÄNTTINEN

MSC student – Automation and Information science

EDUCATION

University of Vaasa

2020 – 2025 est.

Automation and information science as a field of study.

Ressu Upper Secondary School

2016 - 2019

High school graduate

WORK EXPERIENCE

Biila go – Driver in car logistics

2021–now

Responsible for transferring cars between dealerships and clients both within cities across Finland on an on-call basis. The role is highly customer service-oriented, as it involves picking up cars from clients and returning them to clients.

Business college - Summertime IT substitute

Summer 2021

Performed installations and updates for Windows and Mac computers, supported the Microsoft Intune and Autopilot deployment project, handled troubleshooting and customer service at the HelpDesk, and maintained 3D printers and VR environments.

LTP logistics - Warehouse logistics worker

2019–2020

Worked as a warehouse employee at LTP's cold storage facility in Vantaa. Responsibilities primarily included order picking and shipping.
